

There are four seasons in the year, and twelve months. Each season lasts three months.

**Spring**

**Summer**

**Autumn**

**Winter**

**Spring**  
In spring, the weather varies from warm and sunny to cold and rainy.  
Spring is the season of new life. Plants grow buds and flowers.  
Many animals start to have babies.

**Summer**  
Summer is the warmest season, has the highest temperatures, and most daylight hours.  
Warm, sunny days help plants to grow flowers, fruits, and vegetables.  
Bees and other insects are very active.

**Autumn**

**Winter**

March April May June July August September October November December January February

As the season changes from winter to spring:

- the days get longer
- we have more daylight
- the weather gets warmer.

It's important to stay safe in the Sun in the summer.

**Festivals and activities**

Many festivals and celebrations take place in different seasons.

Spring	Summer	Autumn	Winter
Planting seeds	Swimming in the sea	Jumping in leaves	Building a snowman
